DISTRICT COOLING MARKET
By Application (Commercial, Residential, Industrial, & Others)
– Global Trend & Forecast to 2012–2019
MarketsandMarkets is a U.S.-based global market research and consulting company that publishes strategically analyzed market research reports and serves as a business intelligence partner to Fortune 500 companies across the world. MarketsandMarkets also provides multi-client reports, company profiles, databases, and custom research services.

MarketsandMarkets covers fourteen industry verticals, including advanced materials, automotive and transportation, banking and financial services, biotechnology, chemicals, consumer goods, energy and power, food and beverages, industrial automation, medical devices, pharmaceuticals, semiconductor and electronics, and telecommunications and IT.

Figure 7: District Cooling Market Size (Volume), By Region & Country, 2014

Volume (KRT)

Sweden | France | Germany | Finland
---|---|---|---
300 | 400 | 1200 | 1600

Volume (KRT)

U.S. | Canada
---|---
2630 | 920

Volume (KRT)

Japan | China | Malaysia | Singapore | Korea | India | Hong Kong
---|---|---|---|---|---|---
217 | 50 | 50 | 51 | 50 | 100 | 150

Volume (KRT)

UAE | Saudi Arabia | Qatar | Oman | Kuwait | Bahrain | South Africa
---|---|---|---|---|---|---
130 | 118 | 76 | 68 | 12 | 76 | 100
The overall district cooling capacity was estimated to be XX KRT in 2013, and is expected to register a CAGR of XX% between 2014 and 2019.

Emirates Central Cooling Systems Corporation (EMPOWER) and National Central Cooling Company PJSC (Tabreed) are the two major players in the district cooling industry, together accounting for nearly XX% share of the overall district cooling market.

Empower acquired Palm District Cooling (PDC) in the beginning of 2014, thereby increasing its district cooling capacity to more than 1 million RT.

The major district cooling market is concentrated in the GCC region with the market share of companies summing up to nearly XX% of the global capacity in 2013.
DISTRICT COOLING MARKET – BY APPLICATION
District cooling services are majorly consumed by the commercial segment; a trend which will continue in the future.

District cooling is majorly deployed for the commercial sector as it accounts for major share of power and cooling requirements during peak hours for any nation. As a result, using district cooling is beneficial in lowering the power demand curve during peak hours. It will lead to national power grid security, lesser addition of power generation capacity, and simultaneously meeting cooling demand and carbon emissions requirements.

DISTRICT COOLING MARKET – BY GEOGRAPHY
6.3 Middle East & Africa to be the leading destination for the DC market by 2019

In 2013, the Americas led the district cooling market with a share of XX%, which is projected to be overtaken by the Middle East & Africa (MEA) by 2019 with a share of XX%.

This paradigm shift is due to the rapid growth of real estate and commercial sectors in the MEA region along with rapid increase in cooling and peak power requirements. Therefore, district cooling is the viable option in terms of efficiency and environmental safeguard.
