3. Market Potential Rates

Based on in-house analysis and an advanced model which considers the actual market size, trends, forecast market growth, and changes in the market environment, Global Research and Data Services has calculated the predicted Market Potential Rates of the country in question for the coming years. The larger the Market Potential Rate, the more potential the market has in the coming years. Conversely, the smaller the rate, the less potential the market is considered to have in the future.

4. Fertilizer Market Size Compared to Market Growth in Different Countries

Graph 49: Fertilizer market size compared to market growth in different countries

Global Research & Data Services, 2015
Methodology and Sources

The GRDS industry reports are created using the standard methodology of Global Research & Data Services. This includes utilizing, analyzing and combining a wide range of sources and in-house analysis. The GRDS research process comprises the following stages:

1. The first stage of the research process is concentrated on the definition of the industry and products to be included in the research.

2. Next, the research shifts focus to data collection. The market information for the research is collected from all relevant national and international sources such as:
   
   - Industry associations
   - Trade organizations
   - Industry news
   - Market research reports
   - Statistical offices
   - Analyst reports
   - In-house company database
   
   Along with these sources, GRDS employs a large international network for collecting data for the industry reports.

3. After the data collection, all the information is analyzed, aggregated, verified, and aligned in our standard format allowing for easy comparison between different countries and product segments. At this stage, different statistical techniques, models, and forecasting tools are employed to arrive at the final industry figures. The forecast market figures are based on in-house analysis and an advanced model which considers the actual market size, trends, forecast market growth, macro-economic and demographic data, and changes in the market environment.

4. The final stage of the research process is publishing of the final industry data. The final outcome of the GRDS research process is the most up-to-date and reliable industry data in a readily accessible and clearly presented format which helps you gain a much clearer perspective on the actual market situation, trends, and future outlook for different industries.
5. About Global Research & Data Services

Global Research & Data Services is one of the leading sources of global industry information. Since 1992, the company’s strong expertise has helped thousands of companies from more than 70 countries around the world to identify new business opportunities with our key market trends and analysis.

The GRDS advantage rests in the diverse range of industries and countries covered. Every year, the company publishes more than 10,000 industry reports from over 100 industries and 100 countries. This extremely comprehensive coverage is made possible by an experienced team of industry experts and specialists. The company’s expertise and advanced methodology enable the publication of standard format industry reports which allow for easy benchmarking of different countries and product segments against each other.

Our company can provide that difficult-to-find market data from industries and countries that most market research publishers do not cover. The main industries currently covered include, among others: automotive, aerospace and transportation, chemicals, clothing, footwear and textiles, construction and mining, consumer goods, electronics, food and beverages, furniture and furnishing, ICT, machinery and equipment, manufacturing, materials, medical devices, metals, non-metallic minerals, optical goods, packaging, paper and pulp, pharmaceuticals, plastics and rubber, printing, retail and wholesale, tobacco and wood.

By providing the most up-to-date market data in the industry reports, we help you gain a much clearer perspective on the actual market situation, trends, and future outlook for different industries.

The industry reports offer an invaluable resource for industry executives; marketing, sales and product managers; analysts; and other industry experts looking for reliable industry data in a readily accessible and clearly presented format. The reports represent critical tools for any private or public sector decision-makers looking to evaluate the market potential and competitive situation in a given industry and country.
